Anshuman Behera Software Engineer

anshuman3127@gmail.com | 91-7978931892 | Bangalore, Karnataka | github/Ansh2315 | linkedin/anshuman-behera24

SUMMARY

Front-End Developer with 4.5+ years of experience building scalable, responsive web applications in product-based environments. Strong expertise in **Angular, TypeScript, JavaScript, RxJS, NgRx, Nx, and Micro-Frontend architecture**, with hands-on experience in **React, AG Grid, Cypress, SCSS, and Python FastAPI**. Experienced in building reusable components, optimizing performance, resolving production issues, and leveraging **GitHub Copilot and MCP-based AI workflows** to accelerate development. Strong exposure to **REST APIs, PostgreSQL, MongoDB, Agile development, and cross-functional collaboration**.

SKILLS

Languages: HTML, CSS, SCSS, JavaScript(ES6), TypeScript

Frameworks & Libraries: Angular (v12, v14, v18, v20), RxJs, Nx (Micro-Frontend), Bootstrap, Material UI, React

Tools: GitLab, GitHub, JIRA, Azure, Figma

PROFESSIONAL EXPERIENCE

Rockwell Automation, **Software Engineer** 03/2022 – Present | Bangalore, India

- Migrated custom-built tables to **AG Grid**, improving application performance by **50%** and enhancing UX.
- Implemented **MQTT-based real-time notifications**, enabling faster fault detection and reducing accident risks by **40%**.
- Migrated a large-scale Angular application to an **Nx monorepo**, reducing code dependencies and bug rates by **60%**.
- Optimized asynchronous workflows using **RxJS**, improving application responsiveness and maintainability.
- Integrated the **Flourish theme with SCSS**, modernizing the UI and reducing bounce rate by **15%**.
- Built **reusable Angular components and shared platform features**, reducing development effort by **80%** across teams.
- Served as the **primary front-end support engineer** for production issues, resolving critical defects and ensuring application stability.
- Resolved **SonarQube, Black Duck, and dependency vulnerabilities**, improving code quality, security, and maintainability.
- Integrated enterprise libraries including **AG Grid, Google Maps, Form.io, Cytoscape, and ngx-monaco-editor**.
- Implemented **Cypress E2E testing** to improve release reliability and application quality.
- Contributed to backend development using **Python FastAPI**, building metadata APIs and resolving issues across **PostgreSQL and MongoDB**.
- Leveraged **GitHub Copilot** for code generation, refactoring, debugging, documentation, and development acceleration.
- Created **project-specific AI skill files and contextual instructions**, improving AI response accuracy, consistency, and token efficiency.
- Integrated **MCP with JIRA and Figma**, enabling AI-assisted access to tickets, requirements, designs, and project context while reducing manual context switching.
- **Mentored interns** on Angular and front-end development, supporting onboarding and knowledge sharing.

PROJECTS

Core Platform Features 06/2022

- Developed reusable platform features and shared Angular components used across multiple applications, reducing duplicate development efforts by **60%**.
- Improved platform scalability through framework upgrades, dependency optimization, and security enhancements, reducing maintenance effort by **40%**.

Energy Manager

- Built an industrial energy monitoring app with rich visualizations (bar, line, donut charts) to track usage, costs, and emissions.
- Enabled real-time fault detection and performance insights, improving energy efficiency by **70%**, reducing CO_2 emissions by **40%**, and lowering costs by **30%**.

Process Analytics

- Developed an app to monitor and visualize industrial machine alarms with charts and detailed reports.
- Reduced manual checks, enabled faster fault detection, and minimized accident risk by **90%**.

Global Catalogue

- Built a **catalog app** showcasing Dashboards, Apps, Logbooks, and Plugins.
- Enabled clients to **explore product capabilities** through interactive demos.

EDUCATION

Bachelor of Technology(ECE), National Institute of Science & Technology, CGPA: 8.26 08/2018 – 06/2022
